

Regie Igay

SOFTWARE ENGINEER

Pontevedra, Negros Occidental, Philippines 6105 • 09708218657 • regieeigay@gmail.com

SUMMARY

Results-driven Software Developer with experience designing, building, and deploying web and desktop applications using **C#, ASP.NET Core Web API, React.js, and PHP**. Specialized in delivering robust enterprise tools including payroll networks, inventory software, rental management, and enterprise General Ledger (GL) ERP systems. Adept at optimizing database operations across **SQL Server, MySQL, and Supabase** hosted on **Microsoft Azure** to significantly scale processing efficiency and performance.

EXPERIENCE

Software Engineer | 02/2025 - Current | Bacolod City, Philippines

CByte (Computer Programming Services)

- Engineered and deployed a comprehensive **Hacienda Payroll System** utilizing **C# .NET Windows Forms, ASP.NET Core Web API**, and online **SQL Server** databases on **Microsoft Azure**.
- Integrated **Crystal Reports** to automate job and rate tracking processes, increasing payroll processing speed by **2x** over historical manual computation methods.
- Developed a high-volume **Academic Payroll System** supporting automated deduction handling (SSS, Pag-IBIG, PhilHealth, and personal loans).
- Optimized automated and manual transaction calculations for teachers and trainees, accelerating administrative workflows by up to **50%**.
- Built a web-based **Rental Management System** featuring dynamic contract lifecycle tracking for lessees and integrated reporting components.
- Programmed administrative functionalities allowing automated configuration and execution of annual property escalation rate models.
- Designed an enterprise-grade **Inventory System** leveraging **TypeScript, React, ASP.NET Core Web API**, and **SQL Server**.
- Implemented cross-functional stock tracking utilities and embedded an internal accounting module to match active sales items with assigned representatives.
- Engineered full-stack Enterprise Financial Management & GL ERPs (**KAIROS GL** and **DMCGL**) and **VMA Enterprise Payroll** hosted on **Microsoft Azure**.

Software Engineering Trainee | 07/2024 - 12/2024 | Bacolod City, Philippines

Coders Tribe (SDTP)

- Developed dynamic web interfaces using **React, HTML, CSS, Bootstrap**, and **Tailwind CSS**.
- Designed mockups and functional blueprints using **Figma** to map out UI/UX architectures.
- Managed structured query designs and transactional schemas within **MySQL** and **SQL Server**.
- Leveraged **Microsoft Power Platform** (Power Pages, Power Apps, and Dataverse) to engineer custom low-code solutions.
- Configured custom administrative integrations within **Microsoft SharePoint** and **Microsoft Dynamics 365 CRM**.

Software Engineering Intern | 09/2023 - 12/2023 | Bacolod City, Philippines

CByte (Computer Programming Services)

- Completed corporate industrial requirements to earn an official **On-the-Job Training (OJT) Completion Certificate** from CByte.
 - Created and maintained production-level database-driven applications utilizing **C# .NET Windows Forms** and modular **Web APIs**.
 - Generated dynamic business insight summaries within Windows Forms environments using **Crystal Reports**.
 - Tested, debugged, and resolved runtime environment errors to support software patch cycles and deployment tasks.
-

SKILLS

- Programming Languages:** C#, JavaScript, TypeScript, PHP, SQL, HTML, CSS
 - Backend & API Frameworks:** ASP.NET Core Web API, C# .NET, MVC, REST APIs
 - Frontend Libraries & UI/UX:** React.js, Bootstrap, Tailwind CSS, Figma
 - Database Management Systems:** SQL Server, MySQL, Supabase
 - Reporting & Implementations:** Crystal Reports, Excel Export Integration, System Deployment, Testing, Bug Verification
 - Enterprise & Cloud Platforms:** Microsoft Azure, Microsoft Power Apps, Power Pages, Dataverse, SharePoint, Dynamics 365 CRM
 - Product Environments Architecture:** Payroll Systems, Inventory Tracking Solutions, Rental Management Platforms, Financial & GL ERPs
-

EDUCATION

Bachelor of Science in Information Technology | 2024 | Hinigaran, Negros Occidental

Central Philippine State University

- Awarded the academic distinction of **"Best in OJT" (On-the-Job Training) Certificate** by the university board for superior evaluation results.
 - Acquired structural expertise in foundational software design, data storage systems, and dynamic web application logic using **C# .NET, React, ASP.NET Core**, and **SQL Server**.
-

CERTIFICATIONS & ACADEMIC HONORS

- **Certificate of Completion – Software Development Training Program (SDTP)** (12/2024 | Coders Tribe)
Completed intensive training focused on enterprise backend API architectures, front-end ecosystems, and dynamic low-code environments.
- **Best in OJT Excellence Certificate** (2024 | Central Philippine State University)
Conferred by the university department for achieving the highest performance metrics during the industrial immersion program.
- **Certificate of On-the-Job Training (OJT) Completion** (12/2023 | CByte Computer Programming Services)
Verified fulfillment of industrial programming credentials, designing and modifying enterprise desktop software solutions.
